

Certified Enterprise Program Methodology

- ✔ Specializing in Zero-Day Prevention
- ✔ Refining Cybersecurity Expertise
- ✔ Our Certified Enterprise Program

Introduces a series of skill assessment badges, each meticulously crafted to develop essential competencies in cybersecurity, with a special focus on zeroday threat aprevention.

Embark on a journey with Security Institute toward a future toward prevention where cybersecurity transcends the confines of products and certificates. We're committed to fostering a culture of continuous learning and vigilance.

Consider the SolarWinds breach, which was initiated in 2019 but only detected in 2020. The significant impact and ongoing developments of such violations, including recent level 8 threats, highlight the urgency for sustained alertness against such high-level threats.

At Security Institute, we delve deep into these incidents, gleaning essential lessons to strengthen your defenses.

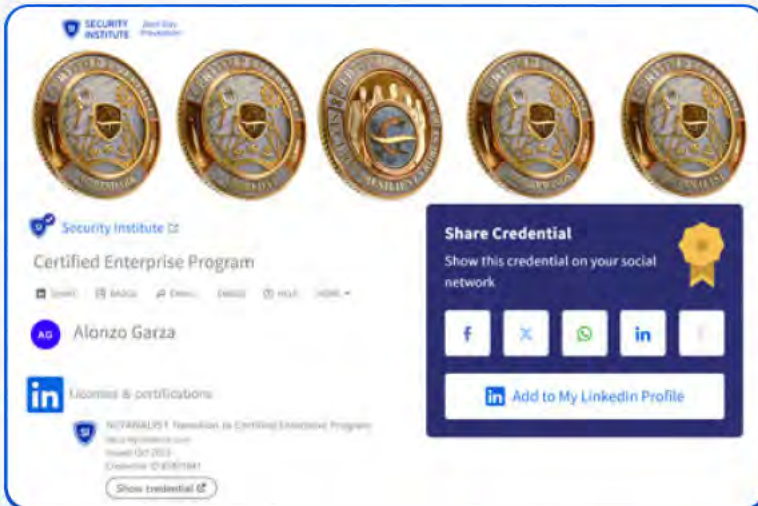

We aim to develop a mindset focused on ongoing cybersecurity vigilance, where prevention is not a one-time fix but a continuous pursuit.

Join us to shift your approach

from reactive to proactive and contribute toward shaping a tomorrow that is free from breaches.

Certified Enterprise Badges: **Your Arsenal Against Digital Threats**

- Achieve mastery with our specialized badges: SolarWinds, Wireshark, Attack-Surface, TCPQUIC, and the pinnacle Zero-Day Badge.
- Mentorship from over 3,500 Certified NetAnalysts in a collaborative, cutting-edge environment.
- Engage with IT pioneers and thought leaders through our expert-led podcasts and industry events.

Digital Recognition of **Your Hard-Earned Skills**

Our cutting-edge badges, displayed in the provided graphic, symbolize a significant step forward in your professional development.

Accredible.com allows you to broadcast this accomplishment far and wide, from LinkedIn to Facebook, ensuring that your network recognizes your commitment to excellence in cybersecurity.

Earning a badge from the Security Institute's Certified Enterprise Program is about proclaiming your expertise to the world. With credentials published on Accredible.com, you join the ranks of top professionals from global leaders like Google, who recognize the power of visible and verifiable achievements.

Embark on a Journey of Cyber Mastery The Security Institute charts a course for those who dare to master the intricacies of cybersecurity.

Join the ranks of elite professionals in our Zero-Day Think Tank, where continuous learning meets career advancement.

Skill Assessment Badges: Tailored to address key areas in cybersecurity, **our badges include:**

- 1 Zero Day Prevention Strategies Badge:** Concentrates on strategies and techniques to preempt and neutralize zero-day threats.
- 2 SolarWinds Breach Lessons-Learned Badge:** Focuses on understanding and applying the lessons learned from the SolarWinds breach to enhance cybersecurity resilience.
- 3 Attack Surface Protection Badge:** Aims at identifying and securing potential vulnerability points to minimize attack surfaces.
- 4 Wireshark Analysis Badge:** Dedicated to using Wireshark for the identification and prevention of zero-day incidents.
- 5 TCP/IP and QUIC Protocol Developments Badge:** Offers the latest insights into TCP/IP and QUIC protocol advancements to aid in the prevention of zero-day threats.

Decision-Making and Critical Thinking

- 1 We evaluate candidates' decisionmaking, critical thinking, and problemsolving abilities. Proficiency in making informed decisions and strategizing in an enterprise context is a key focus.
- 2 Candidates face scenarios that require them to make decisions, strategize, and exhibit critical thinking. These assessments ensure they can apply their knowledge effectively in an enterprise context.
- 3 Critical thinking is vital in solving complex problems in enterprises. The program incorporates scenarios that challenge candidates to think critically, enabling them to excel in real-world challenges.
- 4 Lifelong Learning Commitment Embrace lifelong learning with our annual badge programs, designed to keep you at the forefront of cybersecurity innovation and best practices.

Bill Alderson's leadership "getting the call" from a Pentagon general at 9/11 to lead communications recovery is a testament to our capacity for swift, decisive action in crisis management and cybersecurity resilience.
